PROJECTS

Cure Zone – Doctor Appointment System (MERN)

Oct 2025

Built a full-stack MERN application with React, Node.js, Express, and MongoDB that allows patients to schedule and manage doctor appointments. Implemented secure, role-based authentication and authorization for Admin, Doctor, and Patient user types. Created RESTful APIs to handle CRUD operations, appointment booking, and dashboard functionality, while defining MongoDB schemas and ensuring secure data processing.

Sky Watch – Weather Forecast Web App

Aug 2025

Developed a responsive weather app using HTML, CSS, and JavaScript that retrieves live data from the OpenWeatherMap API. Emphasized a clean user interface, robust client-side functionality, seamless API integration, and reliable error handling to dynamically present temperature, humidity, wind speed, and overall weather conditions.

The Ministry of Nails – Creative Business Website

Sep 2024

Designed and launched a production-ready creative business website highlighting nail art trends and beauty services. Contributed to branding, UI/UX design, responsive layout development, and content management to enhance online visibility, user engagement, and the overall digital presence.
